OBJECTIVE

I have been working at Givaudan Flavors in Cincinnati for the past fourteen years. My objective is to transition into areas of management by leveraging on past knowledge and experience. I feel that I have the right potential to perform well and achieve success in any role because I have the interest and the motivation to succeed. A personal interview would give me the opportunity to demonstrate my potential. I look forward to hearing from you.

EDUCATION

Xavier University Master of Business Administration (M.B.A.), Business Intelligence, GPA 3.956 Graduation date: August 2019 Member of Beta Gamma Sigma Lean Six Sigma Yellow Belt	Cincinnati, OH
University of Houston, TX B.B.A. in Computer Information Systems, 1998	Houston, TX

XAVIER UNIVERSITY COURSEWORK

Foundation Skills

ACCT 500 Foundations of Financial Accounting
STAT 500 Business Statistics

Core Coursework

ACCT 550 Managerial Accounting
BLAW 550 Business Law and Ethics
BUAD 550 International Business
ECON 550 Managerial Economics
FINC 550 Fundamentals of Finance
BAIS 550 Business Information Systems
MGMT 550 Strategy and Organizations
MGMT 551 Operational Analysis
MKTG 550 Marketing Strategy

Capstone

BUAD 691 Global Strategic Thinking

Business Intelligence concentration

BAIS 655: Business Intelligence
BAIS 674: Database Management
BAIS 680: Intro Data Mining for Managers

XAVIER UNIVERSITY CLASS PROJECT

Data mining project (Summer 2019)

Developed a model to predict which customers will purchase a 2-year CD. Using the sample of historical data, the goal was to only provide a list of those customers who will actually purchase a CD. A missed prediction was a missed sale (type II error). First step was in preparing the data which includes understanding the data, cleaning and transforming the data (check for missing values, erroneous data, outliers). Second step was in running multiple models including Logistic Regression and Decision Trees and selecting the best one. Final step was in proving a conclusion in a management report and PowerPoint presentation.

WORK EXPERIENCE

GIVAUDAN FLAVORS

SAP BI Analyst

Cincinnati, OH

11/2011 to Present

- Providing support to the BI user community as part of the APS BI L2 team
- Working on GSD tickets (Requests, Incidents, Problems and Change Requests).
- Troubleshooting issues with BI reports by tracking data flows from source systems to BI systems.
- Performing selective deletions and data reloads in cases of duplicate or missing data.
- Providing support for BI report issues in Design Studio, Bex Analyzer, BusinessObjects Analysis, Bex Query Designer and BI Launchpad.
- Monitoring and troubleshooting process chains daily, weekly and monthly loads in production.
- Working on change requests to fix defects in process chains or BI queries.

SAP Basis Administrator

01/2008 to 10/2011

- Setup early watch alerts for Business Objects systems, upgraded Diagnostics agents and Wily Introscope agents, connected BOBJ systems to the SLD.
- Created shell scripts to monitor spools in waiting & error status, SOST mail in error, heavy cpu usage, daily monitoring of open clients.
- Analysis of long running jobs, performance issues due to migration loads. Analysis of sql statements through ST05 and putting traces, rebuilding indexes to improve storage quality and updating table stats.
- Installed and configured the SAP Web Dispatcher as an instance, created comprehensive documentation.
- Upgraded Solution Manager to EHP1 stack 21. Updated kernel to 7.01, updated ABAP stack to 7.01 using SAINT, updated JAVA stack using JSPM.
- Upgraded GRC (Virs) from 5.2 to 5.3 Abap Add-ons (VIRSAHR, VIRSANH) + Java components (Compliance Calibrator, Access Enforcer, Role Expert, Firefighter).
- Analyze system performance and adjust various tuning parameters to maintain optimum utilization including application server load balancing, operation modes, background jobs, and spool management.
- Perform SAP system, database, operating system, and transaction tuning to ensure the best possible response times for the end-users of the SAP system.
- Performed table space administration by altering table spaces and adding data files as per system requirements.

BearingPoint Inc

Consultant

Warren, NJ

01/2004 to 01/2008

- Basis Administrator during production support phase on project following upgrade from R/3 4.7 to ECC 6.
- Completed successful support pack upgrades, kernel upgrades and post-upgrade tasks.
- Managed TMS, Transports, Spool Administration, Client Administration and Database Administration.

- Performance tuning at SAP layer, DB and OS to optimize the performance and monitoring system at O/S level disk space management and ABAP dumps.
- Created/ executed manual test cases for retirement of menus, reports and validation of backwash files on mainframe application project.
- Unit/ Integration tester on Data warehousing project. Created/ executed manual test cases for testing data-flow from Source systems to Staging, Staging to ODS and ODS to Data warehouse.
- Created scripts for Oracle Apps 11i modules including Receivables, Payables, TeleSales, Supply Chain, Field Service, Order Management, Inventory, Spares and iExpense.
- Quality Assurance Tester on a web-based Deal Management System with three-tier architecture using XSL forms, Java and Oracle.

First Consulting Group

Systems Development Consultant

Somerset, NJ

09/2001 to 06/2003

- Testing of Software Applications using Mercury Automation Testing tools like WinRunner and Test Director.
- Test planning, design, test development and execution, analyzing result and defect tracking using Mercury Products.
- Business function test, performance test, volume test, system test, load test and regression test were conducted on the applications.
- Performed code modifications using PL/SQL, troubleshooting miscellaneous problems for end users.
- Used Shell Scripting to access and update Oracle 8 database.
- Modified and maintained Stored Procedures and Triggers in PL/SQL.
- Configuring and troubleshooting database connectivity, odbc, sqlnet problems.

Arthur Andersen

Oracle Consultant

Roseland, NJ

01/2001 to 08/2001

- Involved in Data Conversion for Oracle Financials Accounts Receivables for Apps11i.
- Worked with users and functional team to derive data requirements for converting Financials Receivables.
- Interfaced with Oracle Financial tables and stored procedures to retrieve and enforce corporate financial data and standards
- Wrote sqlloader scripts to successfully load Receivables data from legacy systems to Oracle tables.
- Wrote PL/SQL programs like Translation programs and Move programs to fix data inconsistencies.
- Created Tar's with Oracle Support to diagnose and resolve validation errors in Receivables Interface processes like Customer Interface, Invoice Interface and Lockbox Interface.
- Worked with DBA's to fix database issues like adding more datafiles to tablespaces, indexes, compiling invalid objects, etc.

AT&T

Oracle Developer (Sr. Technical Associate II)

Piscataway, NJ

06/1999 to 01/2001

- Involved as a Sablime (Source Code Control System) administrator on a Unix platform.
- Involved in Data Archiving project with the purpose of freeing space on the production environment and moving critical information into data warehouses.
- Utilized advanced PL/SQL and shell scripting like Dynamic Cursors, Procedures, Triggers and Packages to create and modify programs.
- Single-handedly created and maintained an intranet website utilizing HTML, Photoshop, Active Server pages and Javascript to provide comprehensive information to end-users in various clusters.
- Executed Emergency Bug Fixes (data cleanup scripts) for performance improvement in Financials Project Accounting.
- Developed Forms using Developer 2000 Forms 4.5 for AT&T custom module.

ONLINE CLASSES

Ruby on Rails: An Introduction - (John Hopkins University)

October 3, 2015

<https://www.coursera.org/account/accomplishments/records/FG9TNS9ZDWV6>

Rails with Active Record and Action Pack - (John Hopkins University)

November 21, 2015

ONLINE CLASS PROJECTS

Super-Hero Flix

2015

This project makes use of test-first development using RSpec and Capybara to create a Ruby on Rails Movie Database app. It utilizes good design and best practices in defining Routing, Views and

Controllers, Models and Database Design. This project is still in progress. The near future will see more advanced Rails concepts like Authentication, Authorization and Many-to-Many Associations implemented. So please check back soon for more details...

<https://superhero-flix.herokuapp.com/>

Recipe Finder

2015

The goal of this project was to provide web page access to recipe information served by <http://food2fork.com/api> through JSON and images. I was tasked with creating a Rails app that will display an index page based on a search keyword entered. The Rails app passes the query to food2fork.com/api and displays the results.

<https://coursera-search.herokuapp.com>

Matching Game

2015

This project required creating an interactive game. Five smiley faces are shown on left and four on right side. The user clicks on the extra face. If correct face is clicked, five more smiley faces are added to both sides. This game makes use of the Document Object Model (DOM) to add and delete nodes and CSS styles for positioning objects.

<http://matching-game.herokuapp.com/>

Ristorante con Fusion

2015

This project creates a simple website for a restaurant using Responsive Design. In the process the Bootstrap front-end framework is utilized to include modals, carousels, containers, grids, breadcrumbs, navbars, panels, tabs, pills, accordions and JQuery just to name a few.

<http://con-fusion.herokuapp.com/>

Interactive Résumé

2015

Developed an interactive resume application that reads resume content from a JSON file and dynamically displays that content within a template.
